

Technical specifications

Dimensions & weight	Short frame version	Long frame version	Double cab version
Width (mm)	1.835	to be released	to be released
Lenght (mm)	4.270	to be released	to be released
Height (m)	2.000	to be released	to be released
Net mass (kg)	1.700	to be released	to be released
Gross mass (kg)	2.800	to be released	to be released
Traction units	Short frame version	Long frame version	Double cab version
Motors	2 x Permanent Magnets	to be released	to be released
Voltage (V)	320	to be released	to be released
Power (kW)	30 (70 peak)	to be released	to be released
Torque (Nm)	200	to be released	to be released
Battery	Short frame version	Long frame version	Double cab version
Type	Li-Ion NMC liquid cooled	To be released	To be released
Power	34.7kWh 4C discharge	To be released	To be released
Performances	Short frame version	Long frame version	Double cab version
Max speed (kmh)	80	to be released	to be released
Max slope (%)	35	to be released	to be released
Max driving range (km / Wltp)	200	to be released	to be released
Trection wheels	4	to be released	to be released
